

Family STEAM Challenge

3D Pop Up Book

The Scenario: Reading has always been a popular activity for children. In the past, people did not have iPads or electronic devices to read books. Many of the books were just writing with pictures. Can you take a popular children's story and make it more interesting for children today? Can you make the book pop?

The Challenge: To design and create an interactive book that makes reading fun. Can you create art that leaps off the page? How will you add special features? Will you include 3-D, pop ups, or flaps for the reader to interact with?

Remember to:

- Complete the design stage first. Draw it out.
- Record the process/steps as you complete them.
- Work together with family members.
- Try to improve your project. How can you make it better?
- Be CREATIVE!
- Have Fun!

**You can use these ANY MATERIALS in this project.
For a list of ideas go to page 2.**

Possible Materials:

- Paper
- Cardboard
- Toothpicks
- Popsicle sticks
- Tinfoil
- Straws
- Tape
- Glue
- Craft Materials
