

Family STEAM Challenge

Talk to Me

The Scenario: Today we use mobile phones to communicate with our family and friends. However, this was not always the case. In the past, people had to use different ways to get a message sent to their friend. Phones have changed throughout the years. They continue to improve and can do so much more than talking. What will future phones look like???

The Challenge: To design and create a phone of the future. What is special or different about your phone?

Remember to:

- Complete the design stage first. Draw it out.
- Record the process/steps as you complete them.
- Work together with family members.
- Try to improve your project. How can you make it better?
- Be CREATIVE!
- Have Fun!

You can use these ANY materials for this project.
For a list of ideas go to page 2.

Possible Materials:

- Paper
- Cardboard
- String
- Buttons
- Popsicle sticks
- Tinfoil
- Straws
- Tape
- Glue
- Craft Materials
